js-codemod/object-shorthand

```
const obj = {
  a: a,
  b: b,
}

↓  ↓  ↓

const obj = { a, b }
```

- 注: これはeslintの--fixでも自動修正可能です

- https://eslint.org/docs/rules/object-shorthand

26

react-codemod/manual-bind-to-arrow

```
class Component extends React.Component {
  constructor() {
    super();
    this.onClick = this.onClick.bind(this);
  }
  onClick() { }
}

                    ↓ ↓ ↓

class Component extends React.Component {
  onClick = () => { };
}
```

*bind*をクラスプロパティに書き換え
